## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1, 9, and 28 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. It is unclear as to how agitation can separate and classify the particles on the impactor upon injection of a solvent solution into the cascade impactor.

In claim 1, it is unclear as to whether the solvent carries the particles. Claim 1, line 7 "injecting a solvent solution into each of the plurality of enclosures containing an impaction surface, carrying particles agitating the solvent applied on each separated and enclosed surface".

### ***Claim Objections***

Claim 1 is objected to because of the following informalities: "analyzation" should be just "analysis". Appropriate correction is required.

### ***Election/Restrictions***

Applicant's election with traverse of Group III in Paper No. 6 is acknowledged. The traversal is on the ground(s) that the claims have been amended to conform to the elected claim language. This is not found persuasive because a restriction is still found to be proper because the restriction was based on an apparatus and method restriction.

Art Unit: 1743

Restriction is proper when inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the process as claimed can be practiced by hand, using stacked trays with holes of decreasing in size in each tray. Adding the liquid sample to the top tray (the one with the largest hole size), the sample would drip down through all the trays, which decrease in hole size, the trays would allow for simple separation and classification of the particles in the sample. The bottom tray would contain the left over liquid sample stripped of all particles, which could be weighed and calculated.

The requirement is still deemed proper and is therefore made FINAL.

### ***Allowable Subject Matter***

Claims 1-5, 9-14, and 28-32 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

### ***Conclusion***

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within

Art Unit: 1743

TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
